## **Redington Introduces the Chena River Women's Wader and Wading Boot**

BAINBRIDGE ISLAND, WA -- Redington's most recent edition to their wading line is a wader and a wading boot designed specifically for women. Active club members from the Northwest Women's Fly Fishers helped Redington design the fit and features of the Chena River Wader and Wading boots, named after a world-class Arctic Grayling fishery in Alaska's interior.

The wader body is constructed from high density 4-layer Red.Storm™ waterproof/breathable Taslan™. Just like men, women can be tough on their waders so Redington has reinforced the front legs to offer durability and greater protection from the elements. The design also takes into account the different shapes of women. The wader features no seam on the inside of the leg which means a longer life for the waders in an area that could see high abrasion. Other fantastic features include:

- A storage pocket on chest with equipment strap for clipping on a zinger, sunglasses or other easy to access equipment
- A fleece lined hand warmer pocket with inner sleeve that can be used to slip in a chemical hand warmer packet to warm hands in colder conditions
- Built in gravel guards with steel hooks for securing them down tight on wading boots so boot laces are covered and boots are protected
- Ergonomic high-density neoprene booties for all day comfort and durability
- Shoulder straps with unique adjusters that adjust to ideal shoulder fit and allow for waist high conversion
- Belt loops and a wading belt with an abstract fish design and a quick release buckle

The Chena River Wading Boots are the most attractive, light and comfortable boots for women in the industry. No more wearing what the guys have to in the normal tans, brown, and green motif! Made from durable Red.Stream synthetic leather and Cordura, they also offer gravel guard attachment points, a stitched and bonded black felt sole, a full perimeter mud guard, tough toe cap and heel counter, ergonomic design elements, and fun fish embroidery on the outside ankle.

The Chena River Waders are \$179.95 SRP and the wading boots are \$79.95 SRP and will be available in November through authorized Redington dealers and online at [www.redington.com](http://www.redington.com).

Redington, who operates from their facility in Bainbridge Island, Washington, has been designing and producing quality, moderately priced tackle and accessories since 1993. A complete lineup of the company's tackle, apparel and waders can be found at the Redington website ([www.redington.com](http://www.redington.com))
