### **Redington's Introduces New Reel for 2008**

#### ***Red.Fly2 Series: Innovative, affordable and virtually maintenance free***

BAINBRIDGE ISLAND, WA – Redington is pleased to introduce a new family of reels for 2008. The Red.Fly2 Series of large-arbor reels is the perfect combination of durability and affordability.

The Red.Fly2 Series comes well-equipped with features that defy its price. A black high-density graphite composite spool paired with a cast-aluminum frame will provide anglers with ultimate corrosion resistance and durability for years. A dependable Rulon disc drag is unfussy and virtually maintenance-free. The spool is quickly released from the frame using a knurled knob for easy change-ups & cleaning. The one-way clutch easily switches from left- to right-handed retrieve depending on the angler's preferences.

Two colors are available for the frame, champagne and copper, which match perfectly with Redington's Red.Fly2 fly rods. Two sizes are available in both colors: 4/5/6 & 7/8/9.

SRP: \$80 Spools SRP: \$29

Redington has been designing and producing quality, moderately priced tackle and accessories since 1993. A complete lineup of the company's tackle, apparel and waders can be found at the Redington website ([www.redington.com](http://www.redington.com)).
