## **Redington Introduces New Rod Family for 2008**

### ***The RS4 :: Newest and largest fly rod family***

BAINBRIDGE ISLAND, WA – Redington is pleased to announce the introduction of their newest family of rods, the RS4 family. Redington completely re-energized the RS3 family for 2008, packing in every ounce of performance into the price.

Fast-action RS4 rods are built around the most popular rod actions Redington has recently built. Completely upgraded from the RS3, the RS4 features high performance 51-million modulus Toray™ graphite in an attractive moss finish. On the freshwater models, the blank color is reflected in the unique reel seat, which features small graphite weave pattern in a custom color made just for Redington and a laser engraved hood. A fully anodized machined aluminum reel seat with a laser engraved logo adorns the saltwater models.

Every rod features Pac Bay aluminum oxide stripping guides, tasteful silver trim wraps, AAA Portugese cork, and alignment dots. Another notable feature includes length and line designations labeled on each rod piece, above the ferrule.

Ten 2-piece models, sixteen 4-piece models, and three Spey models are available in various length and weight configurations.

Limited 2- and 4-piece models are available as outfits with the new Moss-colored CD mid-arbor reel pre-spooled with RIO Mainstream™ fly line and a knotless tapered leader complete in a black Cordura travel case.

Each new RS4 fly rod or outfit purchased from an authorized retailer comes with Redington's lifetime, original-owner guarantee. Redington's RS4 family of rods is designed and manufactured to the high quality, value and performance standards that distinguish all Redington products. The company has been designing and producing quality, moderately priced tackle and accessories since 1993. A complete lineup of the company's tackle, apparel and waders can be found, and now conveniently purchased from authorized dealers, at Redington's website ([www.redington.com](http://www.redington.com)).
