

## **True Large Arbor Design at a Price That Won't Leave You Breathless**

BAINBRIDGE ISLAND, WA – Redington is proud to introduce their newest large arbor reel, the Titanium CDL. Created to replace the Brakewater, which was discontinued earlier this year, the Titanium CDL utilizes an innovative design and state-of-the-art manufacturing.

The CDL has a bold, true large arbor design with superior features and benefits that make it a great reel for many different applications. Whether you are targeting tarpon offshore, stripers from the beach or drifting streams for rainbows, finding what you need in a large arbor reel is easy with the CDL's four different sized models: 5/6, 7/8, 9/10, and 11/12. An oversized cork disc drag has been designed to offer consistent pressure, control and line handling. The Koyo Japanese one-way clutch bearing ensures smooth, immediate engagement for quick pick-ups. Anodized 6061 bar stock aluminum, in an attractive titanium color, is machined for durability and lightness in mind. Completing the design is a large paddle style handle, a quick-change spool, and a laser engraved logo and model indication on each reel.

Each new Titanium CDL purchased from an authorized retailer comes with Redington's lifetime, original-owner guarantee. Redington's Titanium CDL is designed and manufactured to the high quality, value and performance standards that distinguish all Redington products. The company has been designing and producing quality, moderately priced tackle and accessories since 1993. A complete lineup of the company's tackle, apparel and waders can be found at the Redington website ([www.redington.com](http://www.redington.com)).
